Software Development Program
Institution: Power Learn Project   (June 2022 - September 2022)

I I enrolled at the Power Learn Project, a 16-week program of intense training in software development. Self-paced, peer-to-peer learning experience which created networking opportunities and a space to share out ideas.
• Contributed to a 5th place winning project in Web Technology (3 day) Hackathon. Earned a reward $75.
• Covered six course modules i.e Python, Web Technology, Database, Dart, Enterprenural skills and Computing essentials.

About me: I am a strong willed young lady looking forward to explore more in the tech field and gain more knowledge and experience in differnet programming languages. I have a strong passion for technology and aim to inspire other ladies to to join the tech field. I also purpose to enhance my sight reading and instrunmnet playing skills. I also enjoy mental health discussions and purposeful volunteering programs to give back to the community.
